² Department of Mechanical Engineering, King Mongkut’s Institute of Technology North Bangkok, Bangkok, Thailand

Abstract: Instructions providing basic guidelines for preparing camera-ready papers for the “SEE 2006” conference are presented. This document is itself an example of the desired layout for the camera-ready papers. Therefore please use it as Template while editing the manuscript. It is recommended that the abstract contains 200-250 words.

Keywords: At least five keywords separated by commas

1. INTRODUCTION

These guidelines describe the preparation procedure of the final camera-ready manuscript of the paper accepted for oral or poster presentation at the “SEE 2006” conference. When authors submit their work to the “SEE 2006” conference for publishing, they should strictly follow these instructions in order to maintain high publication quality standards of the proceedings.

Each paper must be divided into two parts. The first part includes the title, authors’ names, abstract and keywords. The second part is the main body of the paper.

2. METHODOLOGY

2.1 Paper size and format

The total length of a full paper should not be over 6 pages. Each paper size should be A4 (21.0cm×29.7cm) and the following margins should be set:

- Left margin: 20 mm
- Right margin: 20 mm
- Top margin: 25 mm
- Bottom margin: 25 mm

2.2 Fonts and style: first part

The first part includes the paper title, authors’ names, abstract, and keywords. All fonts must be in Times New Roman, and the font size of the title, authors’ names, affiliations, abstract, and keywords are bold 11pt, 10pt, 9pt, Italic 9pt, and 9pt, respectively.

2.3 Fonts and style: paper body

The second part consisting of the paper body must be edited in single column format. The top-level heading, usually called section, numbered in Arabic numerals, shall appear centered with Times New Roman capital bold 10pt. The numbered level-two heading starts from the left in Times New Roman bold 9pt font. The main text uses Times New Roman 9pt font with single spacing and justified throughout. New paragraphs are indented 4mm on the first line.

3. RESULTS AND DISCUSSION

3.1 Figures and tables

All figures and tables should be placed as close as possible after their first mention in the text. Each table should be in MSWord only with consistent decimals. Large figures and tables may span across the page but their distortion to adjust and/or cover the page should be avoided. Scanned or digital images are to be used (e.g. line art, photos etc) if the output resolution is at least 600 dpi. All spellings and annotations (numbers, letters, symbols and captions) should conform to their usage in the text.

Table 1

<table>
<thead>
<tr>
<th></th>
<th>A</th>
<th>B</th>
<th>C</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1)</td>
<td>150 %</td>
<td>16.3 %</td>
<td>18.2 %</td>
</tr>
<tr>
<td>(2)</td>
<td>31.1 %</td>
<td>33.8 %</td>
<td>29.8 %</td>
</tr>
<tr>
<td>(3)</td>
<td>13.3 %</td>
<td>12.1 %</td>
<td>11.1 %</td>
</tr>
</tbody>
</table>

Table captions should be centered above the tables, figure captions should be centered below the figures; they should be referred to in the text as, for example, Fig. 1, or Figs. 1-3.

3.2 Equations

Equations should be written using Microsoft Equation and numbered consecutively as they appear within the text. Equations should be centered horizontally and numbered with Arabic numerals enclosed in parentheses as shown in the example below. They should be cited in the text as, for example, Eq. (1), or Eqs. (1)-(3) (for plural). Equations should be punctuated with commas or periods when they are part of a sentence.

\[ \dot{x} = Ax + Bu , \quad (1) \]
\[ y = Cx + Du . \]  

where \( x \) is the state vector.

3.3 Units

In the paper, all authors are required to use SI unit.

3.4 Symbols

Abbreviations and acronyms should be defined the first time they are used in the text, even after they have been defined in the abstract.

4. CONCLUSION

Authors are required to write the full paper of their manuscript following the guidelines indicated in this template. It is imperative that authors insert the text of their manuscript directly in this template. It will ensure that the full paper of their manuscript is produced as per the format required for inclusion in the proceedings.

5. ACKNOWLEDGMENTS

The authors gratefully acknowledge the contribution of Dr. Sirintornthep Towprayoon.

6. REFERENCES

References should be numbered in the paper body in order of appearance using numerals enclosed in square brackets [1-3, 5]. They should also be listed at the end of the manuscript (in this section) in Times New Roman 9pt. References should be complete in style as shown in the examples below:
